Art Unit: 2614

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-34 and 70, drawn to method/apparatus for describing a real image as a virtual image, classified in class 345, subclass 419.

II. Claims 35-59 and 71-74, drawn to method/apparatus for generating a shadow image of a virtual object itself, classified in class 345, subclass 426.

III. Claims 60-68, drawn to method/apparatus for mixing a virtual space with a real space, classified in class 345, subclass 629.

2. Inventions (I,II) and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are explicitly described as being different embodiments.

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown

Art Unit: 2614

to be separately usable. In the instant case, invention I has separate utility such as generating a virtual image from a real object not requiring extraction of the shading component and processing thereof with additional virtual images. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
